CLOUD VIEWERS

Step 1: Print sheet, best if in color

Step 2: Cut out on the dotted lines

Step 3: For durability, you can attach popsicle sticks as handles or mount on cardboard- just make sure to keep the viewing hole in the middle clear!

Types of
Clouds

Clouds are made up of very light water droplets or ice crystals that can float in the air. When warm air rises, swells and cools, clouds are formed. Cut out the middle square on the dotted lines. Which clouds can you find?
